School Improvement Team Membership

From GS §115C-105.27: "The principal of each school, representatives of the assistant principals, instructional personnel, instructional support personnel, and teacher assistants assigned to the school building, and parents of children enrolled in the school shall constitute a school improvement team to develop a school improvement plan to improve student performance. Representatives of the assistant principals, instructional personnel, instructional support personnel, and teacher assistants shall be elected by their respective groups by secret ballot. Unless the local board of education has adopted an election policy, parents shall be elected by parents of children enrolled in the school in an election conducted by the parent and teacher organization of the school or, if none exists, by the largest organization of parents formed for this purpose. Parents serving on school improvement teams shall reflect the racial and socioeconomic composition of the students enrolled in that school and shall not be members of the building-level staff."

Safe and Orderly Schools	The Sampson County School System (SCS) has a commitment to excellence in providing a safe and healthy workplace. The safety of employees and students must be given first priority in every activity. To that end, all our employees have access to our district Safety Manual and Crisis Management Handbook. The Safety Manual is provided to help schools ensure their day-to-day practices are in line with best safety practices, prepare for events that can be better managed with a safety plan, and outline protocols for handling potentially hazardous materials in our schools. Although a crisis is an event that is extraordinarily rare and cannot be predicted, the Crisis Management Handbook was prepared to provide the principal and the local crisis team a quick reference guide of procedures to follow when a crisis occurs that affects the school.
Review of the SIP plan and notification of changes	As part of our continuous improvement process, all schools create 2 year School Improvement plans. At the end of the first year of the plan and once test scores are received, the School Improvement Team will review both academic and organizational goals and make changes as needed. The superintendent's designee will be informed when the plan has changed.

Title I Schoolwide Components

The required Title I schoolwide components listed below are implemented and assurance documentation is available at all identified Title I school sites.

Comprehensive Needs Assessment: The comprehensive needs assessment begins the process for planning/reviewing the schoolwide program. The school must gather data about the school, its population (students, teachers, and community), the areas of strength and weakness in terms of student achievement, and other data necessary to understand what should be the focus of the school improvement plan.

Schoolwide reform strategies: Instructional strategies and initiatives in the comprehensive plan must be based on scientifically based research, strengthen the core academic program, increase the quality and quantity of learning time, and address the learning needs of all students in the school.

Instruction by highly qualified teachers: High poverty, low-performing schools are sometimes staffed with disproportionately high numbers of teachers who are not highly qualified. To address the disproportionality, the ESEA requires that all teachers of core academic subjects and instructional paraprofessionals (employees of an LEA who provide instructional support) in a schoolwide program school meet with qualifications required by section 1119. Student achievement increases in schools where teaching and learning have the highest priority and students achieve at higher levels when taught by teachers who know their subject matter and are skilled in teaching it.

High-quality and ongoing professional development: Teachers and other staff in schoolwide program schools must be equipped to face the challenge of helping all students meet the State's academic achievement standards. To do this, they must be familiar with the goals and objectives of the schoolwide plan and receive the sustained, high-quality professional development required to implement them. The statute requires that professional development be extended, as appropriate, to those who partner with teachers to support student achievement, such as principals, paraprofessionals, and parents.

Strategies to increase parental/family engagement: Research continues to demonstrate that successful schools have significant and sustained levels of parental/family engagement. Therefore, it is important that schoolwide plans contain strategies to involve parents/families in the school community. Additionally, state law requires parent representation on every school's improvement team, and federal requirements specify that each school must develop: 1) an approach for communication with parents/families, 2) activities to involve parents/families, and 3) an approach for training parents/families to better understand how to help their children excel in school.

Strategies to attract highly qualified teachers to high-needs schools: Although recruiting and retaining highly qualified teachers is an ongoing challenge in high poverty schools, low-performing students in these schools have a special need for excellent teachers. Therefore, the schoolwide plan should describe the strategies it will use to attract and retain highly qualified teachers.

Plans for assisting preschool students in the successful transition from early childhood programs to local elementary schoolwide programs: This component emphasizes the value of creating a coherent and seamless educational program for at-risk students. Early childhood programs provide a foundation for later academic success, and effective schoolwide programs capitalize on this strong start.

Measures to include teachers in decisions regarding the use of academic assessments: In addition to State assessment results, teachers need current and ongoing assessment data that describe student achievement. These data often come from less formal assessments such as observation, performance assessments, or end-of-course tests. The schoolwide program should provide teachers with professional development that increases their understanding of the appropriate uses of multiple assessment measures and how to use assessment results to improve instruction.

Activities to ensure that students who experience difficulty attaining proficiency receive effective and timely additional assistance: The schoolwide program school must identify students who need additional learning time to meet standards and provide them with timely additional assistance that is tailored to their needs. This assistance must be available to all students in the school who need it.

Coordination and integration of Federal, State, and local services and programs: Schoolwide program schools are expected to use the flexibility available to them to integrate services and programs with the aim of upgrading the entire educational program and helping all students reach proficiency and advanced levels of achievement. In addition to coordinating and integrating services, schoolwide program schools may combine most Federal, State, and local funds to provide those services. Exercising this option maximizes the impact of the resources available to carry out the schoolwide program.
